

PRESS RELEASE

MAC TRAILER INTRODUCES FRAC TANK

MAC Trailer of Alliance, Ohio has engineered and developed a 500 barrel capacity FRAC tank for the drilling and servicing of the oil field industry. Conventional or the flow back FRAC, MAC Trailer has incorporated many standard features to enhance the performance and user friendly aspect of the unit. The MAC FRAC utilizes single smooth wall construction with a double wall feature as optional. To increase the discharge, all units are built with a v-bottom floor; and, all manways are 25" for greater ease of entry and exit.

MAC Trailer is the nation's foremost manufacturer of dump, flatbed, transfer and pneumatic tank trailers. For further information on MAC Trailer, please visit www.MACtrailer.com or call 1-800-795-8454.
