

# RENDERING DUMP TRAILERS

With more than 30 years in business, MAC Trailer understands the importance of dependable equipment and responsive support. Our rendering trailers are built specifically for the demanding conditions of the industry, with durable construction and application-specific features that help transport materials efficiently while minimizing maintenance and downtime.

Available as frame-type dumps and tippers, our rendering trailers can be customized with drain valves, splash shields, center gates, baffles, internal or external blood tanks, and perforated hinged cleanouts. From dependable containment and efficient unloading to durability under rugged hauling conditions, every trailer is engineered around the unique needs of rendering operations, and built with your bottom line in mind.
